Subject: Re: Dimock TAL List for metals

Gene,

Attached is an updated RL table for the Region 3 analysis. This is what I will be providing to **Ex. 4 - CBI** to put with the analytical request.

This is a summary of changes

- Lowered Alcohol limits to 10 mg/L (other units were in mg/Kg)
- Corrections: Nitrate/Nitrite 0.05 mg/L
Total Nitrogen 1.0 mg/L
- Lithium (Li) we will provide a RL of 200 ug/L (may be able to provide a lower level)
- 2-Methoxyethanol was added to SVOC list and the Glycol list. It will be analyzed by both methods.
-
- Still working on Ethylene Glycol -- not sure what the RL will be.

Subject: Dimock TAL List for metals

Stevie,

As you pointed out, we omitted the Li from our list of analytes for metals in Tables 1 and 2 of the sampling plan. I guess the e-mail we received regarding expedited TATs was the only reference/guidance for adding Li. We will add that to our Sampling Plan Tables. All the other non-CLP TAL metals that we had in the SAP Tables (B, Ti, Sr, and U) are all on your RL list. I am currently reviewing the RL lists.

Thanks.
